PROJECTS

Attendance Calendar | React Native, JavaScript, sqlite, IDE - VS Code

2024

- It is a cross-platform application created using the React Native framework, designed for students to keep track of their attendance.
- An attendance calendar for students to view their regular biometric attendance, including arrival and departure times.
- It includes custom and fixed date range fields for calculating the percentage of attendance.

Notes Taker | React js, Node js, Express js, MongoDB

2024

- Designed and implemented a full-stack notes-taking application using the MERN stack, enabling efficient CRUD operations.
- Integrated JWT-based authentication with tokens stored in HTTP-only cookies to enhance security and session management.
- Implemented protected routes and role-based access control to restrict unauthorized access and ensure data integrity.
